From Paris to Marrakech – on track to deliver the Paris Agreement?

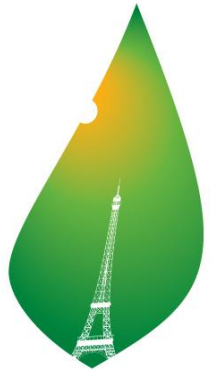

MARRAKECH COP22|CMP12
UN CLIMATE CHANGE CONFERENCE 2016

An historic Agreement

- A new chapter in international climate governance and action
- A win for multilateralism
- A strong signal to policy makers, investors and businesses
- EU leadership played a key role

What was achieved in Paris?

PARIS2015
UN CLIMATE CHANGE CONFERENCE
COP21·CMP11

- **Fair, ambitious and legally binding agreement** with targets for all Parties
- **Transparency and accountability** through robust common rules
- **Dynamism** - 5 yearly reviews to increase ambition towards a **long term goal**
- **International support** for low carbon, climate resilient sustainable development

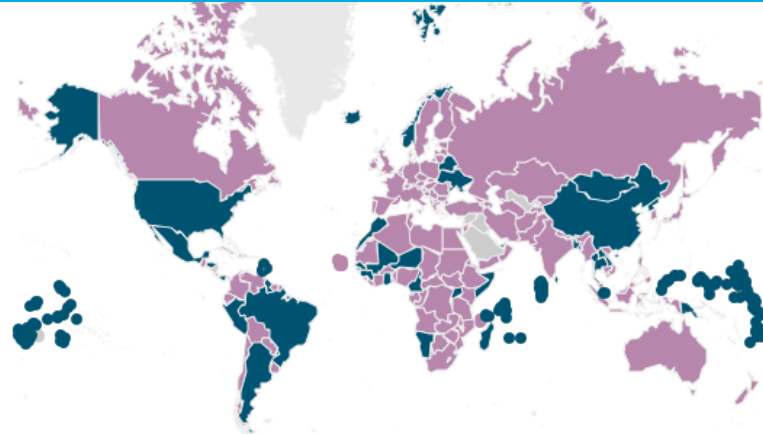

...And accelerated action pre-2020

Paris Agreement: on track for rapid entry into force

Record-breaking signature
ceremony in April– 189/196
Parties have now signed.

Instruments deposited by 77 countries
covering over 60% of global emissions

61 Parties have ratified
of 197 Parties to the Convention

Emissions reductions commitments kick in after 2020
but rules will be applicable as of entry into force

EU priorities going forward

Sustaining the spirit of Paris and securing implementation

NDCs

Proceed with preparing for the implementation of the EU INDC + swift ratification. Support 3rd country NDCs.

Transparency

Develop robust rules and modalities for "an" enhanced transparency framework for all (to be finalised 2018)

Balance

Progress in balance under all elements of the Agreement – mitigation, adaptation and means of implementation

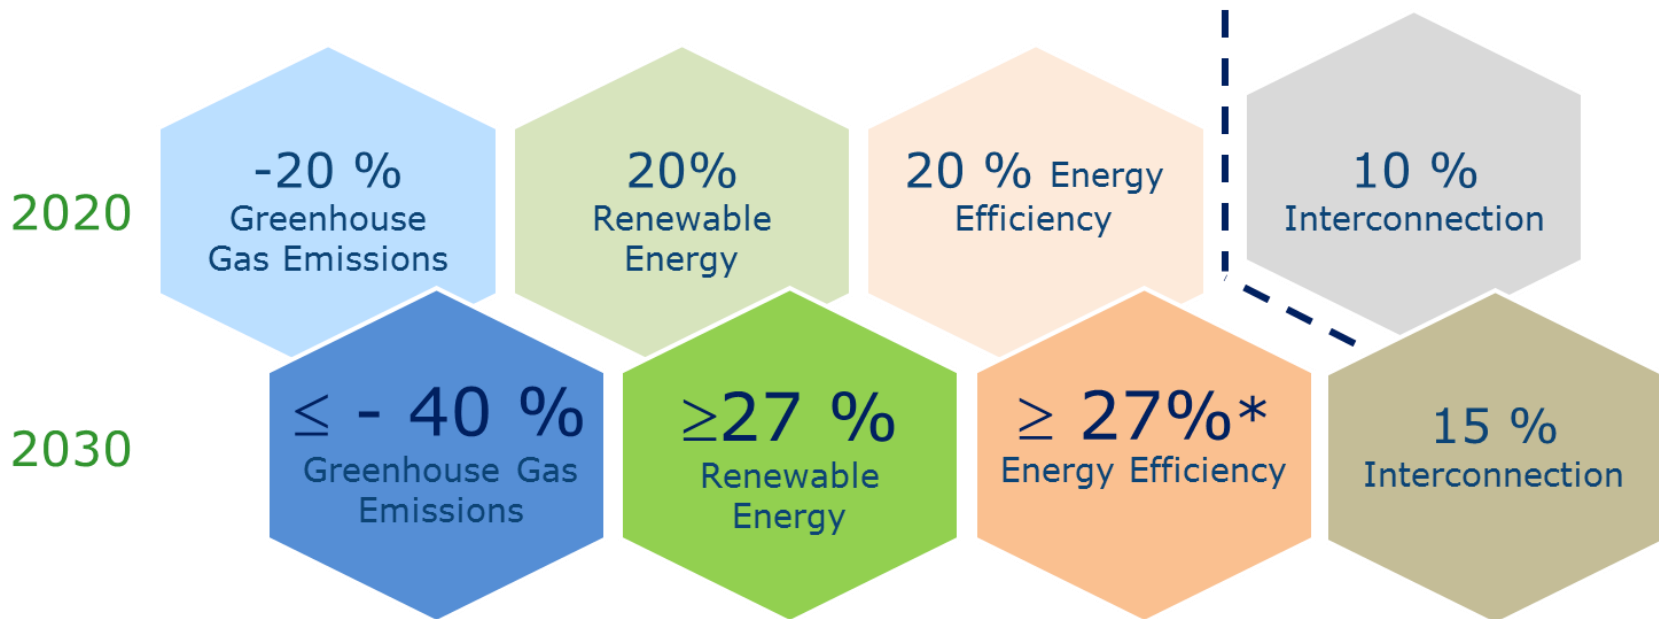

Ambition

Agree on the stocktake process, inputs and outputs, and reflect on the linkages to domestic policies

Solidarity

Demonstrate commitment to the solidarity aspects – continued support and elevating adaptation agenda

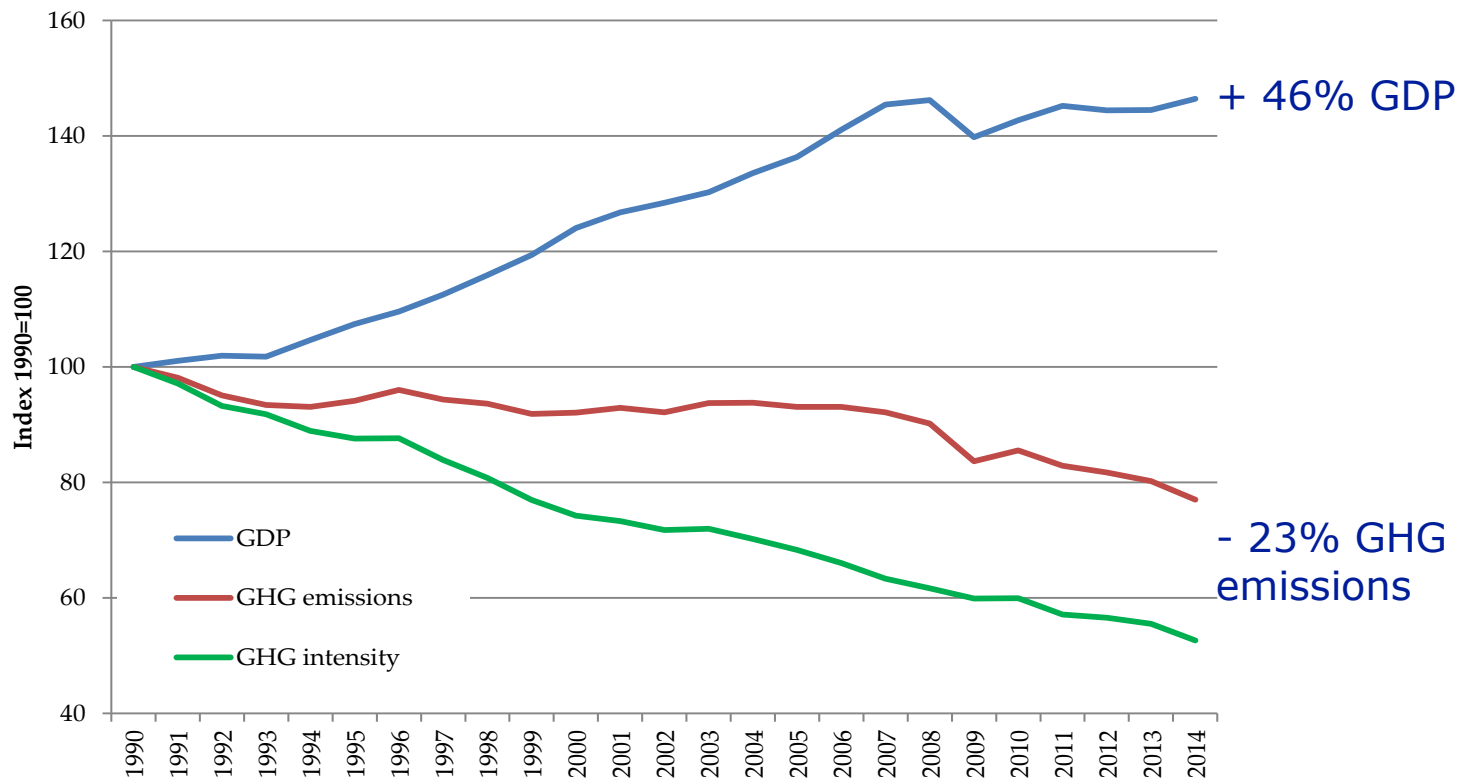

2030 Climate and Energy Framework

What is the Effort Sharing Regulation 2021-2030 about?

- Breaks down the EU target for non-ETS sector of -30% by 2030 into **Member States targets**
- Sets rules for calculating **annual emission allocations** and for the evaluation of Member States' progress towards targets
- Covers almost 60 % of **EU greenhouse gas emissions**
- Includes **buildings, transport, agriculture (non-CO₂), waste, F-gases**, other smaller sectors outside ETS

The EU example: climate action and economic growth can go hand-in-hand

Source: European Commission based on data compiled by EEA

Expectations for Marrakech

Provide evidence of continued political determination
→ Demonstrable progress

Another historic moment?

Entry into force / 1st Meeting of Parties to the Paris Agreement is within reach

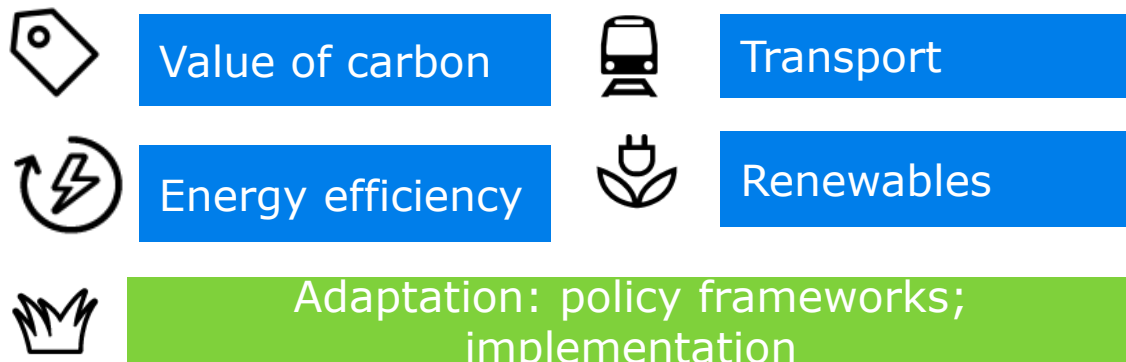

Deliverables under the negotiating process: loss and damage; capacity building; fleshing out the details of the Paris rulebook

Enhancing action and transparency **before 2020**, including strong visibility for a High-Level Event on Global Climate Action Agenda

Supporting progress in other areas – a Global Market Based Mechanism in ICAO, phase-down of HFCs under the Montreal Protocol

Extensive Non-negotiated programme – Global Climate Action Agenda

Demonstrating and encouraging multi-stakeholder action

New initiatives:

- Capacity-Building Initiative for Transparency
- Initiative for Climate Action Transparency
- NDC Partnership
- Africa Adaptation Initiative / Africa Agriculture Adaptation

High Level Champions
